Montpellier, France

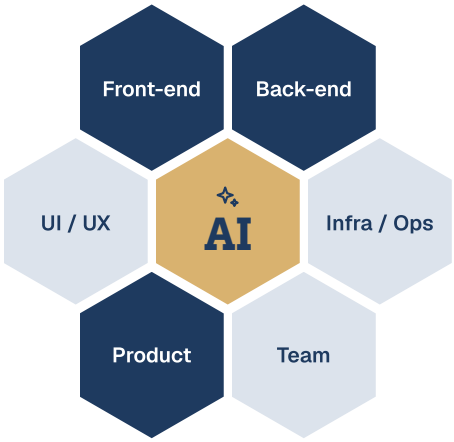

Every cell of a product

A fullstack product engineer: I can develop, but also lead and mentor teams of humans or AI agents.

`TypeScript · React · Vue`

`Ruby on Rails · Elixir · Python`

`Docker · Agentic dev · Harness engineering`

Professional Experience

`2015 - Now`

Freelance

Multiple missions as fullstack, lead, frontend or backend developer. Contributed to several open-source projects along the way.

Main missions

Harnessers — technical support for AI projects

`6 months`

`Claude Code · Codex · OpenCode · MCP`

- Codebase reviews, security flaw detection, software architecture advice
- Harness engineering, agentic development
- MCP server development

Butter — Web3 prediction markets

`8 months`

`Web3 · React · TypeScript`

- Front-end development of a platform for decentralized decision-making
- Wallet connection and trading screens on the blockchain

France VAE — beta.gouv state startup (formerly Avril, REVA)

`5 years`

`Elixir · Nuxt / Vue · TypeScript · Node.js · GraphQL · Postgres GeoJSON & full text search`

- Streamlined the administrative process of obtaining a VAE (accreditation of prior experience) for job seekers
- Improved, optimized and maintained the one-stop-shop application
- UX and accessibility work following public-service standards
- Set up continuous deployment, CI/CD and security audits

Political party — 2024 European election campaign

`6 months`

`Citipo · VanillaJS · Ruby · React · GoGoCarto`

- Led the technical development of the campaign website
- Built the donation platform
- Coordinated with the communication team on campaign launches

Granular Energy — energy transition

`1 year`

`Vue.js · Vuetify · Highcharts`

- Built the front-end of a web app tracking renewable energy production
- Visualized the gaps between renewable energy production and consumption, hour by hour
- Recruited and managed the permanent team (3 people)

Rubix — industrial IoT, in Toulouse — 4 months
React · Redux · D3.js

- Built the front-end of dashboards for sensor data: pressure, temperature, atmosphere
- Real-time charts and alert thresholds per device

Pass Culture — beta.gouv state startup — 1 year
React · Ionic

- Built the Pass Culture mobile app
- Offer discovery and booking screens

CandyVoice — digital voice processing — 4 months
Node.js · Angular.js · PostgreSQL · AWS

- Built the infrastructure for recording voices and generating voice models
- Mobile recorder app
- New version of the company website

Pulpix — smart video player, incubated at Y Combinator — 6 months
JavaScript · headless Chrome

- Wrote the test suite of a library wrapping several video players
- Automated runs in headless Chrome

Mojjo — tennis video analysis — 12 months
Angular.js · PostgreSQL · AWS

- Built an Angular web app on top of a match-analysis algorithm
- Match statistics and filtered replays
- Presented at Roland-Garros 2015

2014 **Ruby on Rails teacher** — Le Wagon — coding bootcamps

- Two-month training sessions for entrepreneurs
- Taught programming with Ruby on Rails and JavaScript
- Lectures, hands-on labs and project presentations

2013 - 2015 **CTO & co-founder** — Copass — one subscription to a worldwide network of coworking spaces

- Built a marketplace aggregating over 500 spaces
- User profiles, payments, third-party payment collection, geographic search, messaging, notifications, SEO
- Recruited and led a tech team of three

Ruby on Rails · React · Postgres · Mangopay · AWS · Mapbox

2010 - 2012 **IT consultant** — Talan Consulting

- Agile restructuring of the information system of a major French railway company
- Wrote specifications
- Ran scoping meetings
- User testing
- On-site deployment support

Engineer by training

2007 - 2010 **Télécom Paris** — Paris & Sophia Antipolis, France
Master of Engineering, Telecommunication, Multimedia track

2009 **University of Queensland** — Brisbane, Australia
University exchange, Master of Information Technology

2005 - 2007 **Lycée Hoche** — Versailles, France
Classes préparatoires MPSI-MP*
