Montpellier, France

Every cell of a product.

A fullstack product engineer: I can develop, but also lead and mentor teams of humans or AI agents.

`TypeScript · React · Vue`
`Ruby on Rails · Elixir · Python`
`Docker · Agentic dev · Harness engineering`

Professional Experience.

Now — **Freelance web developer**

Multiple missions as fullstack, lead, frontend or backend developer. Contributed to several open-source projects along the way.

MAIN CLIENTS: beta.gouv · Granular Energy · les Écologistes · Butter · Rubix

2015 — **Ruby on Rails teacher** — Le Wagon

Taught two-month bootcamps for entrepreneurs, with a focus on best practices in Rails and front-end development.

2014 — **CTO & co-founder** — Copass

Entrepreneurship experience: built a complete marketplace of coworking spaces with Ruby on Rails, Postgres and React. Managed a tech team of three.

2012 — **IT consultant** — Talan Consulting

Large agile project restructuring the information system of the French national railway company.
